Thanks so much for your support of Project **6-4-1**!

Below are the instructions from UMCOR, regarding assembly of the Cleaning Bucket Kits. These instructions do not include shipping instructions, since the **6-4-1** project consists of churches storing their own Cleaning Buckets for 1 year. In the event there is need of them, you will be notified of a central location in your area to deliver the Kits. Since many of the components of the Kit are degradable, it is suggested that after one year, you break down the Kits and disperse them within your circle of needs. It's a good idea to label your buckets with the date of assembly.

Important Kit Assembly Information

- All items included in kits must be NEW items.
- All emergency kits are carefully planned to make them usable in the greatest number of situations. Since strict rules often govern product entry into international countries, it is important that kits contain only the requested items-nothing more.

Do NOT include any personal notes, money or additional materials in the kits. These things must be painstakingly removed and will delay the shipment.

Cleaning Agents. All cleaning agents must be liquid and in plastic bottles. No powders. Pack them inside a bucket or strong outer box.
